About us

Like a light bulb flickering to life in a dark room, Honey Badger Deco was born from the desire to create lighting we could truly be proud of. When we couldn't find fixtures that suited our own personal project, we decided to make them ourselves, and what began as a solution quickly grew into a flourishing business. Through word of mouth, our designs found their way into restaurants, boutique stores, and households both locally and abroad within just months of launching.

We're a proudly South African small business based in Pretoria East, crafting versatile, contemporary lights that bring warmth to any space. Each piece is thoughtfully made, free from harmful substances like glues and formaldehyde, and built with care to ensure lasting quality. Passion drives everything we do. If you're in the area, pop into our Pretoria East showroom and see the glow for yourself. No matter where you are in the country, we ship nationwide, bringing our pieces to your space wherever it may be.

Crafted from natural pine, our products are best enjoyed in sheltered spaces. To preserve their beauty and integrity, we recommend placing them under cover, protected from direct sunlight and rain.

Why the Honey Badger?

Because honey badgers are fearless, bold, and ingenious problem solvers, qualities we strive to embody in every piece we create. At Honey Badger Deco, we bring that same spirit to our décor: lighting that is distinctive, daring, and designed to transform spaces with character and warmth.

Lighting

Our lighting collection is where craftsmanship meets atmosphere, transforming everyday spaces through the art of illumination. Thoughtfully designed and rich in detail, each piece casts a warm, inviting glow while serving as a sculptural focal point. From subtle accents to statement designs, these lights bring depth, character, and a refined sense of ambiance to any interior.

Notes

The wood we use for our products is made from 100% natural compressed pine, with no harmful additives like glues and formaldehyde.

All our pendant lights come standard with a 1m cable (unless otherwise specified) and an electrical fitting for the globe. The globe is excluded.

The tablelamps come with a 1m cable, a light switch and a plug.

All our lights are designed to fit a standard E27 twist-in globe. Globes are not included.

Our lights are designed for indoor spaces, but they may also be hung outdoors in a sheltered setting, beneath a veranda or covered patio, so long as they are shielded from direct sun and rain. If exposed to the elements, their beauty will fade and the materials will deteriorate.
